

As of 30 November 2025

## Fact Sheet

## MFS Meridian® Funds

# Global Total Return Fund

Investment in the fund may involve a high degree of risk and may not be suitable for all investors. Past performance does not predict future returns and your capital is at risk. The value of the fund can be volatile and could decrease substantially in a short period of time. Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different. Investors should not rely on this document alone to make investment decisions and the sales prospectus and Key Information Documents (KIDs) should be carefully considered before making any investment in the fund. **The fund specific risks include: stock risk, bond risk, emerging market risk, derivatives and value risk. These relevant risks, as associated with this fund, are highlighted and defined at the end of this document.**

**Objective**

Seeks total return, measured in US dollars.

**Investment team**

## Fund benchmark

60% MSCI World Index (net div) / 40% Bloomberg Global Aggregate Index

Please see important data methodologies later in this document.

MFS Meridian Funds from time to time may be registered for sale in other jurisdictions or otherwise offered where registration is not required.

MFS Meridian Funds are not available for sale in the United States or to US persons. Information on investors rights is made available in English and, as the case may be, in local language at [meridian.mfs.com](http://meridian.mfs.com). MFS Investment Management Company (Lux) S.à r.l. may decide to terminate the marketing arrangements of this fund in accordance with the appropriate regulation.

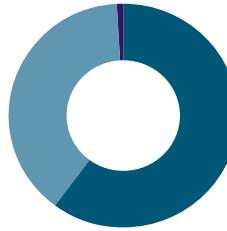

The fund seeks total return by investing in global large cap companies and global bonds.

## Key Points:

- A traditional multi-asset global balanced strategy
- Historically, the fund has allocated assets at approximately 60% stocks, 40% bonds

**Portfolio structure (%)**

- Stocks (60.8)
- Bonds (39.4)
- Cash & Cash Equivalents (0.9)

-1.1% Other. Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different.

Other share classes are available for which performance and expenses will differ.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Please note that this is an actively managed product.

The Fund's benchmark is indicated for performance comparison only.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume distributions within the fund and/or the share class are reinvested.

The source for all fund data is MFS. Source for benchmark performance: SPAR, FactSet Research Systems Inc.

Fund Inception Date: 26 September 2005

<sup>^</sup> Results represent the percent change in NAV.

Periods less than one year are actual, not annualized.

<sup>†</sup> Ongoing charges are expressed at an annual rate as a percentage of net assets and are based on expenses for the semi-annual period ending July 31 or annual period ending January 31. For a Class with less than the full period of data available, or where an adjustment is necessary to reflect current charges, the ongoing charges figure is an estimate. Ongoing charges may vary from year to year. Please see the KID of the relevant Class for the most recent expense information.

<sup>1</sup> The MFS Meridian Funds offer several share classes each with different expenses. Performance reflects the performance of a relevant older class with the same currency until the class inception date of the class detailed. Performance for periods prior to that date may have been higher or lower had the actual share class fees and expenses been reflected.

<sup>2</sup> Base Currency-Hedged share classes aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class and the unhedged currency class of the fund. From time-to-time shareholder transactions in the share class could result in a gain or a loss, which could be significant, in the share

class value that is attributable to the adviser's hedging activities rather than to its investment management activities. Other share classes will not share in these gains or losses.

Class I shares are only available to certain qualifying institutional investors.

Class W shares are available to discretionary portfolio management or independent advisory accounts, clients of financial intermediaries otherwise prohibited from receiving compensation from the Fund, and to employees of MFS and its affiliates.

#### TRAILING 3-YEAR RISK MEASURES VS. BENCHMARK (A2USD)

Beta	0.91
Standard Deviation	9.28 vs 9.29

**Beta** is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. It is most reliable as a risk measure when the return fluctuations of the portfolio are highly correlated with the return fluctuations of the index chosen to represent the market.

**Standard Deviation** is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

#### RISK INDICATOR - CLASS A2USD

◀ Lower Risk (typically lower rewards)	3	Higher Risk ▶ (typically higher rewards)
1	2	4

The rating is based on past volatility of returns and may be different in the future or for other classes of the fund.

See the fund's offering documents for more details, including information on fund risks and expenses.

The offering documents (sales prospectus and Key Information Documents (KIDs)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at [meridian.mfs.com](http://meridian.mfs.com), at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIDs are available in the following languages: Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish, and Swedish. The sales prospectus and other documents are available in English. For additional information, call 352.464.010.600 in Luxembourg or your local paying agent or representative. **Denmark:** Nordea

MFS Meridian Funds is an investment company with a variable capital established under Luxembourg law. MFS Investment Management Company (Lux) S.à.r.l. is the management company of the Funds, having its registered office at 4, Rue Albert Borschette, L-1246, Luxembourg, Grand Duchy of Luxembourg (Company No. B.76.467). The Management Company and the Funds have been duly authorised by the CSSF (Commission de Surveillance du Secteur Financier) in Luxembourg.

The funds have been registered with the Netherlands Authority for the Financial Markets referred to in Article 1:107 of the Act on Financial Supervision (Wet op het financieel toezicht), as an investment institution authorized pursuant to Article 2:72 of the aforementioned Act.

The funds are established as a "restricted foreign scheme" in Singapore. This material has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this material and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the securities may not be circulated or distributed, nor may the securities be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor (as defined in the Securities and Futures Act 2001 of Singapore, as amended or modified (the "SFA")) pursuant to Section 304 of the SFA, (ii) to a relevant person, or any person pursuant to Section 305(2) of the SFA, and in accordance with the conditions specified in Section 305 of the SFA or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. This document has not been reviewed by The Monetary Authority of Singapore.

#### Important Data Methodologies

Top holdings, portfolio characteristics and weightings do not reflect the effect of exposure/weightings for hedging of hedged share classes. Full holdings and net assets do reflect this hedging.

Portfolio characteristics are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

Average Effective Maturity is a weighted average of maturity of the bonds held in a portfolio, taking into account any prepayments, puts, and adjustable coupons which may shorten the maturity. Longer-maturity funds are generally considered more interest-rate sensitive than shorter maturity funds.

Average Effective Duration is a measure of how much a bond's price is likely to fluctuate with general changes in interest rates, e.g., if rates rise 1.00%, a bond with a 5-year duration is likely to lose about 5.00% of its value.

<sup>‡</sup> The Average Credit Quality (ACQR) is a market weighted average (using a linear scale) of securities included in the rating categories. For all securities other than those described below, ratings are assigned utilizing ratings from Moody's, Fitch, and Standard & Poor's and applying the following hierarchy: If all three agencies provide a rating, the consensus rating is assigned if applicable or the middle rating if not; if two of the three agencies rate a security, the lower of the two is assigned. If none of the 3 Rating Agencies above assign a rating, but the security is rated by DBRS Morningstar, then the DBRS Morningstar rating is assigned. If none of the 4 rating agencies listed above rate the security, but the security is rated by the Kroll Bond Rating Agency (KBRA), then the KBRA rating is assigned. Other Not Rated includes other fixed income securities not rated by any rating agency. Ratings are shown in the S&P and Fitch scale (e.g., AAA). All ratings are subject to change. The portfolio itself has not been rated by any rating agency. The credit quality of a particular security or group of securities does not ensure the stability or safety of an overall portfolio. The quality ratings of individual issues/issuers are provided to indicate the credit-worthiness of such issues/issuer and generally range from AAA, Aaa, or AAA (highest) to D, C, or D (lowest) for S&P, Moody's, and Fitch respectively.

#### Important risk considerations

The fund may not achieve its objective and/or you could lose money on your investment in the fund. ■ **Stock**: Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, environmental, public health, and other conditions. ■ **Bond**: Investments in debt instruments may decline in value as the result of, or perception of, declines in the credit quality of the issuer, borrower, counterparty, or other entity responsible for payment, underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. In addition, debt instruments entail interest rate risk (as interest rates rise, prices usually fall). Therefore, the portfolio's value may decline during rising rates. Portfolios that consist of debt instruments with longer durations are generally more sensitive to a rise in interest rates than those with shorter durations. At times, and particularly during periods of market turmoil, all or a large portion of segments of the market may not have an active trading market. As a result, it may be difficult to value these investments and it may not be possible to sell a particular investment or type of investment at any particular time or at an acceptable price. The price of an instrument trading at a negative interest rate responds to interest rate changes like other debt instruments; however, an instrument purchased at a negative interest rate is expected to produce a negative return if held to maturity. ■ **Emerging Markets**: Emerging markets can have less market structure, depth, and regulatory, custodial or operational oversight and greater political, social, geopolitical and economic instability than developed markets. ■ **Derivatives**: Investments in derivatives can be used to take both long and short positions, be highly volatile, involve leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk. ■ **Value**: The portfolio's investments can continue to be undervalued for long periods of time, not realize their expected value, and be more volatile than the stock market in general. ■ Please see the prospectus for further information on these and other risk considerations. ■ For Singapore investors, please refer to the Information Memorandum.

#### Benchmark and vendor disclosures

The 60% MSCI World Index (net div) / 40% Bloomberg Global Aggregate Index (USD) is composed of the following two indices: MSCI World Index - a market capitalization-weighted index that is designed to measure equity market performance in the global developed markets. Bloomberg Global Aggregate Index provides a broad-based measure of the global investment-grade fixed income markets. The three major components of this index are the U.S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian government, agency and corporate securities, and USD investment grade 144A securities.

It is not possible to invest directly in an index.
